

Salman Ramzan

Next.js Developer | Full-Stack Engineer

✉ salman.ramzan23@gmail.com ☎ +92-315-6029913 📍 Multan, Pakistan

🔗 Portfolio 🌐 GitHub 🔗 LinkedIn

Professional Summary

Self-taught and passionate Next.js developer with a strong track record of building fully responsive, modular, and production-grade full-stack web apps using TailwindCSS, Prisma, PostgreSQL, Cloudinary, and Payload CMS. Delivered feature-rich projects including e-commerce platforms, blog engines, admin dashboards, and UI libraries. Efficient in leveraging AI tools like ChatGPT and GitHub Copilot to accelerate development, streamline debugging, and focus on scalable logic and clean UI design. Open to remote and onsite opportunities in Europe and the Gulf.

Education

Projects

Full-Stack E-Commerce Platform with Admin Panel

Built a highly functional, responsive e-commerce platform using Next.js 15 (App Router), TailwindCSS, Preline UI, and Prisma ORM with Vercel Postgres.

- Modular architecture with reusable components and dark/light mode
- Fully-featured admin dashboard: charts, product/category/user/order management, settings
- Complete landing page with hero, client logos, categories, new arrivals, hot product, newsletter, about, FAQs
- Additional pages: login, sign-up, forgot password, contact, product/category detail, cart, checkout, legal pages
- Includes responsive sticky navbar, four-column footer, back-to-top button (desktop only)

Full-Stack Blog App with Payload CMS

Developed a modern, content-driven blog platform using Next.js (App Router), TailwindCSS, Preline UI, Cloudinary, Render's Postgres, and Payload CMS.

Features: blog CRUD, image upload, category filtering, rich-text editor

Admin content management via Payload

Fully responsive with dark/light theme and modular components

Netflix Clone using TMDB API

Created a sleek streaming UI using Next.js and TMDB APIs to simulate Netflix functionality.

- Sticky navbar with built-in search bar
- Left sidebar for category-based exploration
- Dynamic hero section with rotating movie posters and CTA buttons (Watch Trailer / Play Movie)
- Movie rows and cards on homepage with hover effects
- Clicking a card opens a movie detail page with metadata and trailers
- Fully responsive and mobile-optimized layout

One-UIX – TailwindCSS UI Component Library

Built a pixel-perfect, modern UI component library using TailwindCSS for rapid frontend development.

- Includes prebuilt sections like navbar, footer, hero, features, pricing, testimonials, newsletter, FAQ, CTA
- Fully responsive, dark/light mode ready, and uses a modular architecture
- Built with developer experience in mind — ideal for fast page building and landing pages
